Possible Solutions:

 - Probably need larger files for Unity projects

Version Control + Storage Solutions

GitHub

- Great usability and user interface
- Everyone is familiar with it
- Has limits on file storage size, which we will need for Unity

Gitlab

- Better storage than GitHub
- Recommended by Dr. Robb for Unity projects

Unity Collaborate

- Built-in collaboration and version control features with Unity and Unity Hub
- Support specifically for Unity projects
- Cost - only five seats come for free, the final seat will be \$7/month
